

CLOCK IN THE BOX

Design Wall Clock Kit

TFA®

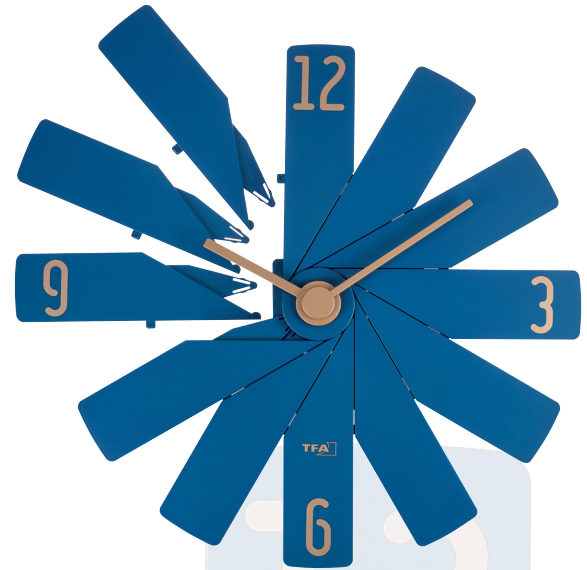

Designer Andreas Brückner has created a timepiece whose timeless design will outlast fads. He has also managed to house the impressive XL wall clock in a small box, saving space and resources as the **CLOCK IN THE BOX**.

As a home accessory, this wall clock suits kitchens, living rooms, hallways and any room where you want to set a visual highlight. It even fits in the bedroom or study because its sweep movement works almost silently and reduces ticking to a minimum. The clock comes in four different colour options. This spatial miracle can also be quickly packaged as an original gift.

This designer wall clock is, after all, a master of efficiency: Its quality clockwork is powered by an AA battery that lasts on average for about 3 years.

In the compact packaging of the CLOCK IN THE BOX, you will find the clock mechanism and the 12 plug-in parts of the clock face. Tip: The QR code in the operating instructions takes you directly to the video tutorial. But even without the video, the clock can be put together in no time and is ready to adorn your walls.

- ✓ **Dial consists of 12 plug-in parts**
- ✓ **Simple plug-in system made of high-quality plastic**
- ✓ **Space-saving packaging**
- ✓ **Silent „Sweep“ movement**
- ✓ **Quality clockwork (+/- 0.5 seconds / day)**
- ✓ **Long battery life (about 3 years)**

CLOCK IN THE BOX Design Andreas Brückner (2023)

Andreas Brückner has been designing products for TFA Dostmann for over 25 years.

Due to his Multiple sclerosis (MS) disease, Andreas had to adapt several times to new ways of working. The **CLOCK IN THE BOX** was not only created entirely in his creative mind, but was also designed exclusively by head control. We find that incredible and want to share his story to encourage all people, who may somehow be limited in their ability, to take on new challenges and make the seemingly impossible happen.

For every purchase of the CLOCK IN THE BOX, we will donate € 1 to the aMSel, regional association of the DMSG (German Multiple Sclerosis Society) in Baden-Württemberg e.V.
