HOLOclock

60.5009.04 HOLOclock Radio controlled clock with 3-D effect

Fascinating as a hologram

The **HOLOclock** is an absolute technology delight creating a **stunning effect**. The display appears as a 3-D image in midair.

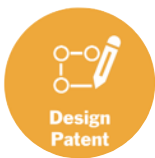

Patented optics

Through **patented optics**, the time, date and temperature will be projected by means of beam splitter lens technology.

Adjustable display and lighting

Choice of permanent display of time, date, or temperature. Also, an automatic change of the display is possible varying between time, date or temperature. A choice of up to four levels of adjustable brightness. The intensity of illumination is also automatically adjusted to the light intensity in the room. Wich is a useful feature especially for bedrooms.

- **Innovative patented 3-D display**
- **Radio-controlled clock with highest precision and manual setting option (European time signal - DCF 77)**
- **Indication of the date and time**
- **Indication of the indoor temperature**
- **Change of display options between permanent and varying (changing alternatively between date, time and temperature)**

Technical data:

- Measuring range temperature: -5 to +50°C (+23 to 122°F)
- Dimensions: 165 x 84 x 35mm
- Weight: 162g
- Includes Batteries (2 x 1,5V AAA) and power adapter
- Patented

**Fascinating as a
hologram**
